**Abstract:** In this paper the instructions for preparing camera-ready paper for International Conference M&MS 2021 are given.

**Keywords:** camera-ready paper, International Conferences, M&MS 2021.

## I. INTRODUCTION

In order to achieve a high quality of M&MS 2021 Conference Proceedings the authors are requested to follow instructions given in this sample paper.

## II. INSTRUCTION FOR AUTHORS

The length of each submitted paper has to be from 3 to 5 full pages. A title of the paper must be written using 22 pt font, centered. The spacing between a title and authors line is 6 mm. Author's names (without affiliation) should be typed using 14 pt font. Author's affiliation (institution, address, email) should be given at the bottom of the first column using 9 pt font.

Times New Roman 10 pt font should be used for normal text. The normal line spacing is 1.5 times of the font size. Please equalize the length of the columns on the last page. Paragraph should be indented 3.5 mm.

Manuscript have to be prepared in two column separated by 5 mm. The margins for A4 (210x297) are given in Table 1.

Table 1. PAGE LAYOUT DESCRIPTION

Paper size	A4
Left margin	15mm
Right margin	15mm
Top margin	20mm
Bottom margin	34mm
Column spacing	5mm

At the beginning of the paper the abstract and keywords should be given. Abstract should be about 50 words. It is desirable to have up to 5 keyword. Please use 9 pt **bold** font for abstract and keywords and 9 pt *italic* for the words "**Abstract**" and "**Keywords**" followed by semicolon.

A text of the paper is divided into a number of sections. The section titles should be typed using 12 pt

font in SMALL CAPS OPTION. For numbering use Roman number. The space after section and between the last section and the next section title are 5 mm.

The formulas and equations should be centered and numbered, referenced in the text. Please use Word Equation Editor to present your formulas. Larger equations have to be splitted into multiple lines. A typical example of equation is shown in Eq. 1:

$$\frac{\partial^2 i}{\partial x^2} = \frac{LC}{|\Delta x|^2} \frac{\partial^2 i}{\partial t^2} + \frac{L}{|\Delta x|^2 R} \frac{\partial i}{\partial t}. \quad (1)$$

All tables should be made in MS Word editor Tables must have title located above the table. Table captions should be written using 9pt by Times New Roman font. Figure are placed to text, numbered and commented by bottom text, as to example at Fig.1

Fig.1. Drawing explanations

The figure size should not be greater than page (column) size. Figure must be of high quality. The figure should be commented by explanation of graphical and text notations and aligned by center. Every introduced figure is referenced in the main text.

The references to literature sources are numerated by order of their reference in the text of thesis and identified by numbers in square brackets. For example [1], [1, 2], [1-4].

## III. CONCLUSION

In this paper the instructions for preparing camera-ready paper for including in the Proceedings of International Conference M&MS 2021 are given. The document, prepared by author, has to be submitted using current instructions. Authors are responsible for the content of presented materials.
